EDUCATION

National Technological University, Argentina —
Information Systems Engineering

CURRENTLY ENROLLED REMOTELY

General description about my formal studies: An Information systems engineer is a professional with a solid analytic education that allows the interpretation and resolution of problems through applying systematic methodologies and technologies of information processing. The skills and education acquired can be applied specially for integrating information that comes from different and concurrent disciplinary fields to a project in common.

Udacity, Remote — *Full Stack Web Developer Nanodegree*

AUGUST 2017 - 2018

Mastered Relational databases with SQL, and leverage Python to incorporate database logic into programs.

Built multi-user web applications using the Flask framework, SQLAlchemy, and authentication providers such as Google.

Deploy web applications onto Linux servers. Securing and configuring Linux web servers. Deploy a full stack application to a live server with a database and routing.

LIVE PROJECTS

Albino.com.ar — *Retailer E-commerce Store*

Co-founder and Project Manager.

EXPERIENCE

Albino.com.ar (Retailer Company), Santa Fe, Argentina

JANUARY 2010 - PRESENT

Deployed and maintained enterprise resource planner software (Odoo) that boosted the company and revenue by 200% since implementation.

Instructed 5 employees on how to operate with the ERP platform in different roles.

Managed Google Cloud Services.

Performed Linux Server Administration.

Fashion Modeling, Worldwide

JULY 2014 - JULY 2018

I worked as a fashion model and traveled to a variety of countries (Italy, Turkey, India, China, Philippines, Thailand, United Arab Emirates) where I mainly developed my communication skills with people from different cultures and it also provided me with a wider view of the world.
